TITLE	First, Second, and Third Graders' Reading Abilities. 1998-99 Progress Report.
INSTITUTION	Louisiana State Dept. of Education, Baton Rouge.
PUB DATE	1999-08-00
NOTE	242p.
PUB TYPE	Numerical/Quantitative Data (110) -- Reports - Research (143)
EDRS PRICE	MF01/PC10 Plus Postage.
DESCRIPTORS	Early Intervention; Primary Education; *Public Schools; *Reading Achievement; *Reading Difficulties; *Reading Improvement; State Legislation; *Student Evaluation; Tables (Data); *Test Results
IDENTIFIERS	*Louisiana

ABSTRACT

Including the Spring 1999 reading data from all public elementary schools in Louisiana containing first, second, and third grades, this report provides the results of the analysis of the Developmental Reading Assessment data that measured the reading abilities of all students in Louisiana. Louisiana is committed to improving students' reading abilities, with a primary emphasis on early intervention. It targets students who are at risk of experiencing difficulty in reading. Table 1 includes each district's total enrollment for grades first through third and the reading levels of those students. Table 2 reflects reading data for each district's schools, and Table 3 reports a comparison of Fall 1998 and Spring 1999 reading data for each district's second and third grade students. Results indicate that 69.07% of the first, second, and third graders who were assessed are reading on or above grade level. (Contains a Summary of Findings and 5 charts to illustrate these findings.) 1998-99 Progress Report
First, Second, and Third Graders' Reading Abilities
August, 1999

Executive Summary
Introduction and Background

The Legislature, State Board of Elementary and Secondary Education, and the State Department of Education are committed to improving the reading and mathematics abilities of all students in Louisiana, with a primary emphasis on early intervention. To this end, the Legislature in 1997 appropriated 30 million dollars for a K-3 Reading and Mathematics Initiative (R.S. 17:24.9); and in the 1998 Legislative Session, 20 million dollars was allocated for the same purpose. The target population for this initiative is those students who are at risk of experiencing difficulty in reading and/or mathematics in kindergarten through third grade.

This report includes the Spring 1999 reading data from all public elementary schools containing first, second, and third grades. Table 1 includes each district's total enrollment for grades first through third and the reading levels of those students. Table 2 reflects reading data for each district's schools. Table 3 reports a comparison of Fall 1998 and Spring 1999 reading data for each district's second and third grade students. Additional information regarding this progress report can be found on the State Department website: www.doe.state.la.us.

R.S. 17:181 (House Bill 2444--Act 450), enacted during the 1997 Regular Legislative Session, directed that the State Board of Elementary and Secondary Education (SBESE), in cooperation with the Department of Education and all public schools, report on the number of students not reading on grade level in all second and third grades throughout the State at the beginning of each school year.

Specifically, R.S. 17:181 included the following provisions:

- *each governing authority shall implement at each elementary school a reading program that is designed to teach students to read on grade level by not later than the end of first grade;*
- the program shall include but not be limited to a phonics component;
- each second and third grade teacher shall report the number of students not reading on grade level;
- the data for each school and for each school system, and for the state as a whole, shall be reported in the school progress profile.

The State Board of Elementary and Secondary Education also directed, through its rule-making authority, that school districts assess **all first grade students and that a post assessment** be administered to second and third graders in order to measure progress in reading over the year.

During the initial year of implementation (1997-98), school districts were allowed to select an appropriate means for measuring students' reading abilities. The SDE and SBESE allowed local choice of assessment tools in the initial year due to the extremely short time frame for implementation of the legislative request. Basal reading tests, informal reading surveys, computerized reading inventories, and other measurements such as norm-referenced tests or criterion-referenced tests were among the methods used in assessment.

SBESE, the SDE, and the Legislature were all cognizant of the need to establish a uniform method for measuring reading performance statewide.

Assessing Students' Reading Ability -- *The Developmental Reading Assessment (DRA)*

In May 1998 the Board of Elementary and Secondary Education approved the ***Developmental Reading Assessment***, published by Celebration Press, as the **uniform assessment instrument**to be implemented statewide in the fall of 1998. The *Developmental Reading Assessment* is an individually administered instrument that evaluates the two major aspects of reading: accuracy of oral reading and comprehension through reading and retelling of narrative stories. Both aspects of reading are critical to independence as a reader. The assessment consists of twenty stories that increase in difficulty. Factors which contribute to the gradient of difficulty of the stories include the number of words on a page, complexity of vocabulary, length of the stories, degree of support from the pictures, as well as complexity of sentence and story structure.

The *DRA* is appropriate for assessing grade-level reading ability; it is also used for early detection of reading difficulties. The instrument helps teachers by focusing on specific problems of each child and by serving as a guide to the classroom reading instruction, based on the individual needs of each child. Early diagnosis of specific reading difficulties, when matched with appropriate instruction, can help to ensure that the students progress in school and become successful lifelong learners.

With the uniform assessment in place, the Legislature, the State Board of Elementary and Secondary Education, the State Department of Education, and local school districts and schools will be provided with a more accurate and valid picture of the reading abilities of our students.

Students Assessed and Included in the Spring 1999 Survey

In determining which students were assessed, the Louisiana Department of Education used the following criteria:

- all regular education students who were enrolled as of October 1, 1998;
- all special education students whose IEP designated they were in a specially designed, regular instructional program;
- all Limited English Proficient (LEP) students who were enrolled in and who had completed at least two full consecutive academic years in an English-speaking school (including kindergarten);

- students who are addressing regular curriculum standards in alternative programs or placement,
- all disabled students according to Section 504

Summary of Findings
Louisiana Reading Assessment
Spring 1999

Based on the analysis of the *Developmental Reading Assessment* data provided by classroom teachers, the findings are noted as follows:

1. Of the 58,293 first graders assessed

- 22,425 or 38.47% were reading below grade level
- 20,501 or 35.17% were reading on grade level, and
- 15,367 or 26.36% were reading above grade level

In summary, 35,868 or 61.53% of the first graders who were assessed are reading on or above grade level. (No Fall Assessment)

2. Of the 54,246 second graders assessed

Spring 1999 Fall 1998

- 12,737 or 23.48% were reading below grade level vs. 56.36%
- 22,460 or 41.40% were reading on grade level vs. 29.53%
- 19,049 or 35.12% were reading above grade level vs. 14.11%

In summary, 41,509 or 76.52% of the second graders who were assessed are reading on or above grade level vs. 43.64% on or above grade level in the fall

3. Of the 53,469 third graders assessed

Spring 1999 Fall 1998

- 16,185 or 30.27% were reading below grade level vs. 34.48 %
- 19,815 or 37.06% were reading on grade level vs. 45 .72 %
- 17,469 or 32.67% were reading above grade level vs. 19.80 %

In summary, 37,282 or 69.74% of the third graders who were assessed are reading on or above grade level vs. 65.52% on or above grade level in the fall

4. Of the 166,008 first, second, and third graders assessed

- 51,347 or 30.93% were reading below grade level
- 62,776 or 37.82% were reading on grade level
- 51,885 or 31.25% were reading above grade level

In Summary, 114,661 or 69.07% of the first, second, and third graders who were assessed are reading on or above grade level.

Note: This is the first year that the *Developmental Reading Assessment* has been used statewide. In 1997-1998 different types of assessment were used by the districts; therefore, comparisons of this year's scores with last year's should be avoided.
